

Heaven - Cocktails & House Music

Creating a Heaven on earth, in LED

Designing a venue is never easy, but when you also need to turn the main lights off as it is a dance venue for 80% of the time, what can you do to keep the vibe going - the life, the colour, the action - you use LED NEON, that's what.

We created a new SHOT BAR led neon to be placed - you guest it!! by the SHOT BAR! Using vibrant yellow and loud pink added extra sparkle to the dark and allows the club revelers to find their way to the most important of spots.

Made from 100% recycled clear acrylic and brought to life with superwhite LEDs, this club land classic will be shining long and bright into the night when maybe some of the party goers are worse for wear!

It fits in so well with all the others.

LED NEONs in Heaven

Heaven x 2
GOD is a DJ
SHOT BAR
Why can't I have fun all the time

Looking just as fresh and impactful OFF as it is ON, with super bright LEDs that will stay bright, it has been created and built with cutting edge CNC milling, LED lights and deep colour silicon tops - this can be enjoyed for many, many years to come.

You need to go and strut your funky stuff @
