

Swansea City NEON Signs

Our local club - a real honour

Having been fans of the Swans all our lives, it was a real pleasure to have worked with the Commercial Department to design and create a special LED NEON to celebrate the historic double win over Cardiff City in the 2021/22 season..

Wanting to create that special piece of art that could live in a supporters home, man cave or even a commercial bar was top of the list for an item to make an impact!

From initial design concepts through to signed off artwork by the Graphic Design Team at Swansea City, each step of the process had the fan in mind, and what they would love to see and own.

Made from 100% recycled plastics and the sign itself is 100% recyclable - having green credentials and a low onward carbon footprint was a big deciding factor for the club.

Available Sizes

500mm dia - Large

120mm dia - Extra Large

Looking just as fresh and impactful OFF as it is ON, with super bright LEDs that will stay bright, it has been created and built with cutting edge laser engraving, LED lights and deep white silicon tops - this can be enjoyed for many, many years to come.
